EUROCOMPULSION V3 INTAKE SYSTEM

The EUROCOMPULSION R3T V3 Intake Kit features 5ply Silicone for super low thermal conductivity and long durability. Turbo friendly bends ensure a more efficient than stock flow(all of our intakes engineered during flow testing) Replaces the restrictive stock intake tract with a larger diameter solid silicone intake tract. Comes with everything you need to step it up a notch. Our most conservative intake system with a stock like sound and better throttle response.

DYNO TESTING:
