

EURO+DRIVE PEDAL PRO

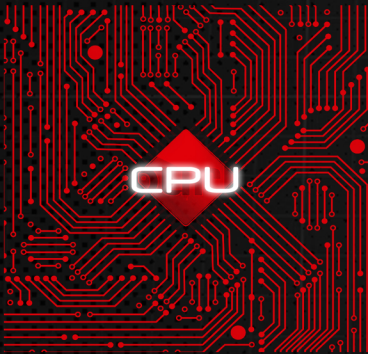

The **EURO+DRIVE Pedal Pro** is an electronic throttle control module that allows powerful end user customization and pedal response tuning done easily on the fly. The Pedal Pro's sleek and compact design offers easy installation and discreet use with a simple to use interface. 3 modes, 17 different settings, and multiple features such as anti-theft mode, full throttle launch, and snow mode.

The EURO+DRIVE Pedal Pro is made to be compatible with all EURO+DRIVE Flash tuning and is programmed not to interfere with full throttle tuning parameters and trims at full load.

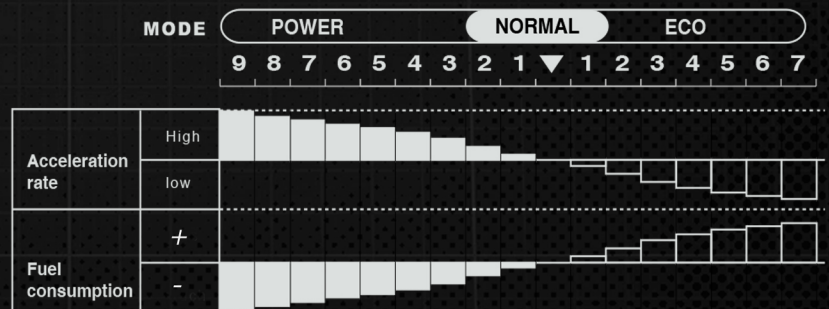

FEATURES / TECH INFO

- *ergonomic design*
SLEEK, USER FRIENDLY INTERFACE

- *3X cpu core processors*
1000/SEC PROCESSING SPEEDS, MIMICS ECU THROTTLE SIGNAL FOR SUPERIOR SIGNAL REACTION TIME

- *3 modes, 17 total settings*
PRECISION END USER CUSTOMIZATION, WITH PEDAL RESPONSE TUNING CAPABLE OF ON-THE-FLY ADJUSTMENTS. THE CONTROLLER MODULE REMEMBERS PREVIOUS SETTINGS FOR EACH MODE.

FEATURES / TECH INFO

FTL (full throttle launch) -

ALLOWS FULL THROTTLE SIGNAL AT THE SLIGHTEST TOUCH OF THE PEDAL WHEN ENGAGED. THIS MODE IS DISENGAGED BY LETTING OFF THE THROTTLE< OR PUSHING ANY BUTTON

**- SNOW mode**

ENABLING GIVES AUTOMATIC DECREASED SENSITIVITY IN CASE OF DRIVING SCENARIOS WHERE QUICKER RESPONSE MAY RESULT IN LOSS OF TRACTION (SUCH AS RAIN, ICE, ETC)

ANTI THEFT mode -

TURNS OFF CONTROLLER DISPLAY AND DISABLES ALL PEDAL INPUT WHEN ACTIVE, EVEN WHEN ENGINE HAS BEEN STARTED

**- FLASH TUNING COMPATIBLE**

THE PEDAL PRO IS PROGRAMMED TO VECTOR SIGNAL RESPONSE AT FULL THROTTLE POSITION , ELIMINATING ANY INTERFERENCE WITH OTHER TUNING PARAMETERS OR TRIMS AT FULL LOAD
